EPA-1\_Crosshole\_8\_12\_08.xls

Paul—

Thank you for the water-level records from the cross-hole tests that were run at source well B-32-D3 on 8/12/2008 at Powerex.

Attached are the water-levels recorded at EPA-01-D3 during the tests. A packer was inflated just below the water level in the Westbay riser pipe, with the D3 port open. The transducer was suspended just below the bottom of the packer. No discernible response was observed at EPA-01-D3 from the two pressure-release pulses at B-32-D3, which were initiated at times 12:46 and 14:41. The record does show that the D3 water levels declined about 0.07 feet per hour during the tests.

Subject Powerex Crosshole Testing raw data

Dave,

Per our discussion yesterday, please find attached the 4 raw data files from the crosshole testing at B-32D3.

Please feel free to contact me if you have any questions.
